This book introduces readers to the theory, design and applications of automotive transmissions. It covers multiple categories, e.g. AT, AMT, CVT, DCT and transmissions for electric vehicles, each of which has its own configuration and characteristics. In turn, the book addresses the effective design of transmission gear ratios, structures and control strategies, and other topics that will be of particular interest to graduate students, researchers and engineers. Moreover, it includes real-world solutions, simulation methods and testing procedures. Based on the author's extensive first-hand experience in the field, the book allows readers to gain a deeper understanding of vehicle transmissions. Cavity Ring-Down Spectroscopy: Techniques and Applications provides a practical overview of this valuable analytical tool, explaining the fundamental concepts and experimental methods, and illustrating important applications. Designed as both an introductory text and a reference source, this book is relevant for scientists unfamiliar with CRDS who are interested in using the technique in their research, as well as experienced users. There's an entire generation of South African women who ought to read this book.' - Sara-Jayne King, author of Killing Karoline 'Ougat is masterfully written - raw, unpretentious, unsettling. Shana Fife captures all the darkness from her body, psyche and life with fearless honesty and transparency.' - Frazer Barry, award-winning theatre practitioner, writer and musician By the time Shana Fife is 25 she has two kids from different fathers. To the Coloured people she grew up around, she is a jintoe, a jezebel, jas, a woman with mileage on the pussy. She is alone, she has no job and, as she is constantly reminded by her community, she is pretty much worthless and unloveable. How did she become this woman, the epitome of everything she was conditioned to strive not to be? Unsettlingly honest and brutally blunt, Ougat is Shana Fife's story of survival: of surviving the social conditioning of her Cape Flats upbringing, of surviving sexual violence and depression and of ultimately escaping a cycle of abuse. A powerful, fresh and disarming new voice - Shana's writing is like nothing you've read before. This is a comprehensive work on China and the Middle East, addressing the increasing Chinese involvement in the Middle East and China's strategic interests in the region. Mit Blick auf die Fahrdynamik werden in diesem Band die konventionellen Elemente und deren Zusammenwirken mit mechatronischen Systemen dargestellt. Dabei werden zunächst Grundlagen und Auslegung, danach in besonders praxisnaher Darstellung die Fahrdynamik beschrieben. Es folgen ausführliche Beschreibung und Erläuterung der modernen Komponenten. Ein eigener Abschnitt widmet sich den Achsen und Prozessen für die Achsenentwicklung. Electrification is an evolving paradigm shift in the transportation industry toward more efficient, higher performance, safer, smarter, and more reliable vehicles. There is in fact a clear trend to move from internal combustion engines (ICEs) to more integrated electrified powertrains. Providing a detailed overview of this growing area, Advanced Electric Drive Vehicles begins with an introduction to the automotive industry, an explanation of the need for electrification, and a presentation of the fundamentals of conventional vehicles and ICEs. It then proceeds to address the major components of electrified vehicles—i.e., power electronic converters, electric machines, electric motor controllers, and energy storage systems. This comprehensive work: Covers more electric vehicles (MEVs), hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs), range-extended electric vehicles (REEVs), and all-electric vehicles (EVs) including battery electric vehicles (BEVs) and fuel cell vehicles (FCVs) Describes the electrification technologies applied to nonpropulsion loads, such as power steering and air-conditioning systems Discusses hybrid battery/ultra-capacitor energy storage systems, as well as 48-V electrification and belt-driven starter generator systems Considers vehicle-to-grid (V2G) interface and electrical infrastructure issues, energy management, and optimization in advanced electric drive vehicles Contains numerous illustrations, practical examples, case studies, and challenging questions and problems throughout to ensure a solid understanding of key concepts and applications Advanced Electric Drive Vehicles makes an ideal textbook for senior-level undergraduate or graduate engineering courses and a user-friendly reference for researchers, engineers, managers, and other professionals interested in transportation electrification. The African Continental Free Trade Area (AfCFTA) represents a historic opportunity for the continent to boost intra-African trade and accelerate structural transformation. However, this relies on a critical policy instrument: the effective implementation of preferential trade liberalization among the AfCFTA members. Whether in practice African firms will utilize tariff preferences under the AfCFTA depends on a critical factor: rules of origin (RoO) and the net benefits of complying with them. This report argues for the adoption of flexible RoO and a strengthening of institutional capacities to ensure an impartial, transparent, predictable, consistent and neutral implementation of agreed RoO. Fahrwerke moderner Pkw stellen je nach Konfiguration eine Kombination mechanischer, hydraulischer, pneumatischer, elektrischer und elektronischer Komponenten dar, wobei sich mit jeder Neuentwicklung der Anteil elektronischer Steuerungs- sowie Regelsysteme erweitert und der Funktionsumfang der fahrdynamischen Eigenschaften zunimmt. Mit Blick auf die Fahrdynamik werden in diesem Band die konventionellen Elemente und deren Zusammenwirken mit mechatronischen Systemen dargestellt. Dabei werden zunächst Grundlagen und Auslegung, danach in besonders praxisnaher Darstellung die Fahrdynamik dargelegt. Es folgen ausführliche Beschreibungen und Erläuterungen der modernen Fahrwerk-Komponenten. Eigene Kapitel widmen sich den Achsen und Prozessen für die Achsenentwicklung. Die Überarbeitung enthält u.a. Aktualisierungen zum autonomen Fahren, zu Elektrofahrwerken aktuellsten Fahrerassistenzsystemen sowie die Zukunftstendenzen im Fahrwerk. Das 7. Wissenschaftsforum Mobilität, das im Juni 2015 an der Universität Duisburg-Essen stattfand, suchte Antworten auf Fragen nach der Entwicklung und Umsetzung neuer Verkehrskonzepte, nach neuen Fahrzeugantrieben und -systemen, neuen Produktionsverfahren und nach neuen Managementkonzepten und -instrumenten. Der vorliegende Tagungsband zeigt Lösungen und Wege auf, wie diese Herausforderungen aus Sicht der betriebswirtschaftlichen und ingenieurwissenschaftlichen Forschung bewerkstelligt werden können. Dabei müssen nicht nur nationale, sondern auch internationale Entwicklungen neuartiger Mobilitätskonzepte, Technologien und Produktionsverfahren Berücksichtigung finden. Kathrin Dudenhöffer untersucht, welche Marktpotentiale für Elektrofahrzeuge in Deutschland und China vorhanden sind und welche Faktoren die Akzeptanz potentieller Nutzer beeinflussen. Dafür erhebt die Autorin Daten per Repräsentativbefragungen und führt in beiden Ländern Experimentstudien mit Probefahrten in Elektrofahrzeugen durch. Ihrer Arbeit liegt ein Theoriemodell zugrunde, das auf dem Technology Acceptance Model basiert. Zur Berechnung des Modells wurde ein PLS-Ansatz mit überwiegend formativ spezifizierten Konstrukten gewählt. Die Studie zeigt, dass die persönliche Erfahrung mit dem Produkt zu Beginn der Diffusion essentiell ist, denn durch die Teilnahme an Probefahrten ändern sich die Akzeptanzstrukturen positiv. Der Vergleich zwischen Deutschland und China gibt Aufschlüsse über ungenutzte Marktpotentiale; so zeigt sich in Peking eine hohe Nutzungsintention für Elektrofahrzeuge nach den Probefahrten. Es wird deutlich, dass sich die Akzeptanzmuster zwischen Deutschland und China unterscheiden.

Non-Exhaust Emissions: An Urban Air Quality Problem for Public Health comprehensively summarizes the most recent research in the field, also giving guidance on research gaps and future needs to evaluate the health impact and possible remediation of non-exhaust particle emissions. With contributions from some of the major experts and stakeholders in air quality, this book comprehensively defines the state-of-the-art of current knowledge, gaps and future needs for a better understanding of particulate matter (PM) emissions, from non-exhaust sources of road traffic to improve public health. PM is a heterogeneous mix of chemical elements and sources, with road traffic being the major source in large cities. A significant part of these emissions come from non-exhaust processes, such as brake, tire, road wear, and road dust resuspension. While motor exhaust emissions have been successfully reduced by means of regulation, non-exhaust emissions are currently uncontrolled and their importance is destined to increase and become the dominant urban source of particle matter by 2020. Nevertheless, current knowledge on the non-exhaust emissions is still limited. This is an essential book to researchers and advanced students from a broad range of disciplines, such as public health, toxicology, atmospheric sciences, environmental sciences, atmospheric chemistry and physics, geochemistry, epidemiology, built environment, road and vehicle engineering, and city planning. In addition, European and local authorities responsible for air quality and those in the industrial sectors related to vehicle and brake manufacturing and technological remediation measures will also find the book valuable. Acts as the first book to explore the health impacts of non-exhaust emissions Authored by

experts from several sectors, including academia, industry and policy Gathers the relevant body of literature and information, defining the current knowledge, gaps and future needs Drawing on an incomparable breadth of international examples, Svend Hollensen not only demonstrates how global marketing works, but also how it relates to real decisions around the world. Extensive coverage of hot topics such as blue ocean strategy; celebrity branding; brand piracy; and viral marketing. Brand new case studies focus on globally recognised brands and companies operating in a number of countries, including IKEA, Philips, Nokia, Guinness and Cereal Partners Worldwide. All new video cases accompany every chapter and are available at www.pearsoned.co.uk/hollensen, featuring such firms as Nike, Starbucks, BMW, Ford and McDonalds. Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

The Forest of Sherwood combines many of the most romantic elements of English history in one place. The ruthless Norman monarchs hunted here, but the Forest was still full of peasant life while great events were taking place at Clipstone's royal 'palace'. The Norman barons, fearing death and judgement, gifted land to the monasteries, and the monks became the first great owners of Sherwood besides the king. When the monasteries were swept away their place was quickly taken by acquisitive landowners who, through marriage and payment, became the new aristocracy. Some say they actually stole what was left of Sherwood from the Crown itself. For a brief time these gilded nobles ruled the Forest and the whole country, building political dynasties on local wealth and influence, with grand houses to match. The discovery of coal seemed to offer an even grander future of limitless wealth but it all vanished in barely two generations as stiffer taxation, combined with excessive gambling, womanising and wasteful living, threw away wealth that had taken generations to build up. Today Sherwood and the Dukeries has a different economy, increasingly based on tourism, as visitors come to see a Forest that is more legendary now than it ever was in centuries gone by. There have been many books about the Dukeries, but they have usually concentrated on one family or one house. Adrian Gray weaves together the story of places and people that have made the area special, although not necessarily in the way that tourists imagine. Using a combination of theoretical analysis and case studies, this book analyses the theoretical issues — concept and type of independent innovation, and the practical issues — construction of institutional system which is in favor of independent innovation. It is written for researchers who are engaged in similar fields and readers who are interested in independent innovation. In this book, a comparison of the independent innovation modes of China, Japan and South Korea is presented. The ability, mode and track are defined clearly. The efficient path of Chinese independent innovation is put forward through case studies. Contents: IntroductionThe Urgency for Implementation of Independent Innovation Strategy in ChinaThe Efficient Path Towards Chinese Independent Innovation: Understanding Through Case StudiesThe Capacity, Mode and Trajectory of Chinese Independent InnovationThe Method and Mechanism of Technology Integration in Enterprise Independent InnovationThe Institutional Guarantee of Chinese Independent Innovation: The Construction of an Innovation System Readership: Researchers, students and the general public who are interested in innovation. Keywords: Independent Innovation; Innovative Country; Innovation System; Innovation Subject; Market for Technology Review: Key Features: In this book, a comparison of the independent innovation modes of China, Japan and South Korea is presentedThe referential experience is summarized on the basis of the case study of the process of enterprise independent innovation

At the height of her journalism career, more than one million households across the country knew her name and her face. Her reportage on human suffering and triumph captivated viewers, and with it Vanessa Govender shot to fame as one of the first female Indian television news reporters in South Africa. Always chasing the human angle of any news story, Govender made a name for herself by highlighting stories that included the grief of a mother clutching a packet filled with the fragments of the broken bones of her children after they'd been hacked to death by their own father, and another story where she celebrated the feisty spirit of a little girl who was dying of old age, while holding onto dreams that would never be realised. Yet Govender, a champion for society's downtrodden, was hiding a shocking story of her own. In *Beaten But Not Broken*, she finally opens up about her deepest secret - one that so nearly ended her career in broadcast journalism before it had barely kicked off. She was a rookie reporter at the SABC in 1999. He was a popular radio disc jockey, the darling of the SABC's Lotus FM, a radio station catering to nearly half a million Indian people across South Africa. They were the perfect pair, or so it seemed. And if anyone suspected the nature of the abusive relationship, Govender says, she doesn't believe they knew the full extent of the horror that the popular DJ was inflicting on this intrepid journalist. The bruising punches, the cracking slaps, and the relentless episodes filled with beatings, kicking and strangling were as ferocious as the emotional and verbal abuse he hurled at her. No one would know the brutal and graphic details of Govender's story ... until now. In *Beaten But Not Broken*, this Indian woman does the unthinkable, maybe even the unforgivable, in breaking the ranks of a close-knit conservative community to speak out about her five-year-long hell in this abusive relationship. Her story also lays bare her heart-breaking experiences as a victim of childhood bullying and being ostracised by some in her community for being a dark-skinned Indian girl. Govender tells a graphic story of extreme abuse, living with the pain, and ultimately of how she was saved by her own relentless fighting spirit to find purpose and love. This is a story of possibilities and hope; it is a story of a true survivor. Sustainable Automotive Energy System in China aims at identifying and addressing the key issues of automotive energy in China in a systematic way, covering demography, economics, technology and policy, based on systematic and in-depth, multidisciplinary and comprehensive studies. Five scenarios of China's automotive energy development are created to analyze the possible contributions in the fields of automotive energy, vehicle fuel economy improvement, electric vehicles, fuel cell vehicles and the 2nd generation biofuel development. Thanks to this book, readers can gain a better understanding of the nature of China's automotive energy development and be informed about: 1) the current status of automotive energy consumption, vehicle technology development, automotive energy technology development and policy; 2) the future of automotive energy development, fuel consumption, propulsion technology penetration and automotive energy technology development, and 3) the pathways of sustainable automotive energy transformation in China, in particular, the technological and the policy-related options. This book is intended for researchers, engineers and graduates students in the low-carbon transportation and environmental protection field. China Automotive Energy Research Center (CAERC), Tsinghua University, established in 2008, is a university-wide interdisciplinary automotive energy research institution affiliated to Laboratory of Low Carbon Energy (LCE), Tsinghua University. More than 30 researchers are working at CAERC, including six full professors. CAERC's mission is to create and disseminate sustainable automotive energy knowledge, research and development of integrated automotive energy system assessment methodologies and models, and provide technological and policy options for sustainable automotive energy system transformation in China and the world. Mobilität ist der Motor unseres Wohlstandes. Verschlingt aber enorme Mengen Erdöl und ist für einen großen Teil der Schadstoffemissionen verantwortlich. 2050 werden neun Milliarden

Menschen auf der Erde leben und Mobilität auf Basis von Erdöl scheint unmöglich. Vielen gilt die Elektromobilität als Lösung dieser Probleme. Die meisten Automobilhersteller planen die Einführung von Elektrofahrzeugen oder haben bereits Modelle im Angebot. Die Zukunft der Elektromobilität liegt weitestgehend im Dunklen und von einem Massenmarkt ist man heute weit entfernt. Diese Arbeit entwirft Szenarien der Elektromobilität und der Mobilität im Allgemeinen für die nächsten Jahrzehnte. Sie zeigt auf, wie sich Mobilität und eine ganze Industrie wandeln könnten und welche Chancen und Risiken daraus für die deutsche Automobilindustrie resultieren. Eine wirklich schöne Arbeit. Sehr ausführlich, ein schöner Rundumblick durch die Elektromobilität. (Projektleitung e.Motion, Volkswagen AG)

Government policy on the development of supporting industry in Vietnam. For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.
