HIGCSE Geography Module 4 Mar 16 2020 Geography is a course of four modules to prepare students for the HIGCSE or similar examinations. The modules have been developed for the Cambridge Open Learning Project (COLP) to provide access to quality education for students in Southern Africa. • The outcomes-based approach encourages students to give their own ideas • Modules are divided into units • Self-mark activities reinforce learning • Exercises help learners measure their progress • Summaries reinforce what

students have learnt • Answers to questions are provided • Real-life case studies from Southern Africa are included
Connecting Teaching and Learning Dec 05 2021 Teacher Work Samples are increasingly being used by teacher preparation programs to quantify the complex set of tasks that comprise effective teaching on a daily basis and document the effectiveness of preservice teachers' impact on student learning. The featured case studies from 10 universities and insights from key policy leaders capture current knowledge on practice, research and policy linked to Teacher Work Samples. The book also includes Del Schalock's own description of the evolution of TWS as well as his thoughts about remaining theory development needed to effectively link teacher preparation and student learning.

Handbook of Research on Improving Engineering Education With the European Project Semester Sep 02 2021 Engineering education aims to prepare engineering undergraduates for their future professional journey where they will be called on to solve challenges affecting individuals, companies, and society. The European Project Semester (EPS) exposes students to project- and challenge-based learning, paying special attention to international multidisciplinary teamwork, sustainable design, innovative thinking, and project management in order to develop a set of desired professional skills. The Handbook of Research on Improving Engineering Education With the European Project Semester shares the best practices in engineering education through close examination of the EPS. It describes the adopted learning framework, analyzes how it contributes to the development of skills, reports on the types of challenges proposed to teams, and delivers a set of team-project cases from the network of providers. Covering topics such as engineering ethics, project management, and sustainable behavior, this book is essential to students in engineering, engineers, engineering educators, educational researchers, academic administration and faculty, and academicians.

Managing Projects with Microsoft Project Desktop May 30 2021 The goal of this training book is to provide students with the knowledge and skills necessary to effectively manage projects using Microsoft Project Desktop (2010, 2013 & 2016). **TARGET AUDIENCE** This training book is intended for Project Managers, Project Schedulers, Managers, Supervisors, Team Leads and other people responsible for managing projects. These individuals are involved in or responsible for scheduling, estimating, coordinating, controlling, budgeting and staffing of projects and supporting other users of Microsoft Project. **COURSE OUTLINE** Module 1: Overview of Microsoft Project Lesson 1: What's New in Project? Lesson 2: Backstage Area Lesson 3: The Ribbon Lesson 4: Project Views Module 2: Configure Project Settings Lesson 1: Configuring Display and Schedule Settings Lesson 2: Creating and Configuring

Calendars Lesson 3: Creating and Saving a Project Schedule Lesson 4: Scheduling Types Module 3: Working with Tasks Lesson 1: Managing Tasks and the WBS Lesson 2: Working with Task Dependencies Lesson 3: Working with Constraints Lesson 4: Advanced Task Features Module 4: Working with Resources Lesson 1: Resource Types Lesson 2: Creating Resources Module 5: Assigning and Leveling Work Resources Lesson 1: Working with Resource Assignments Lesson 2: Factors that Affect Assignments Lesson 3: Viewing Resource Assignments Lesson 4: Resolving Resource Allocations Module 6: Finalizing the Project Schedule Lesson 1: Understanding the Critical Path Method Lesson 2: Working with Groups, Filters and Highlights Lesson 3: Setting the Project Baseline Module 7: Tracking and Updating Project Schedules Lesson 1: Overview of Tracking the Project Schedule Lesson 2: Tracking Project Progress Lesson 3: Updating Project Progress Module 8: Working with Advanced Features Lesson 1: Linking Multiple Project Schedules Lesson 2: Working with Master and Subprojects Lesson 3: Working with Resource Pools Lesson 4: Integrating with Microsoft Excel and SharePoint

AT COMPLETION After completing this training book, you will be able to: * Understand the new user interface of Microsoft Project. * Initialize Microsoft Project settings. * Create a Work Breakdown Structure (WBS). * Create task relationships in a project schedule. * Configure advanced task information. * Use the Task Inspector. * Create and manage resources. * Assign and level work resources. * Review and finalize the project schedule. * Track and update project schedules. * Manage multiple projects and resource pools.

PREREQUISITES You should have a working knowledge of the following: * Microsoft Windows Server 20xx networking. * Basic project management concepts.

SOFTWARE REQUIREMENTS In order to complete the hands-on practices in this course you will require the following software: * Microsoft Project Standard or Microsoft Project Professional * Any version between 2010 - 2016 * Microsoft Excel * Any version between 2010 - 2016

TRAINING FILES Additional training files (PowerPoint slides, LabFiles and Hyper-V Build Guides) can be downloaded from our website at <http://www.learnmsproject.ca/support/training-files/>

Project Management the Agile Way, Second Edition Mar 28 2021 “...a well written and content rich book. From a teacher's perspective, using this book in an advanced project management seminar challenges students to understand the application of these concepts.” —Alexander Walton, PMP, IT consultant to the University of California at Berkeley Widely acclaimed as one of the top agile books in its first edition, *Project Management the Agile Way* has now been updated and redesigned by popular demand. This second edition is in a modular format to facilitate training and advanced course instruction, and provides new coverage of agile, such as hybrid agile methods, the latest public sector practices, and a chapter dedicated to transitioning to agile. It discusses the “grand bargain” between project management and business; the shift in dominance from plans to product and from input to output; and introduces new concepts such as return on benefit. Experienced practitioners and students that want to learn how to make agile work effectively in the enterprise should read this book. Individuals preparing for the PMI Agile Certified Practitioner (PMI-ACP)® examination, and training providers developing courses, will find this second edition quite helpful.

Managing Microsoft Project Online Nov 04 2021 TRAINING FORMAT This training book is designed to work in either as a self-study or within an instructor-led classroom environment. Detailed course syllabus can be found at our website:

<https://www.pmologistics.com/managing-microsoft-project-online> DESCRIPTION The goal of this training book is to provide students

with the knowledge and skills necessary to effectively plan, deploy and administer Microsoft Project Online. TARGET AUDIENCE

This training book is intended for Administrators, Systems Engineers, PMO Managers, Project Managers, Consultants and other people responsible for the deployment and management of a Microsoft Project and Portfolio Management (PPM) Solution using Project

Online. AT COMPLETION After completing this training book, students will be able to: * Deploy Project Online. * Work with Office

365 Admin Center. * Configure and manage security. * Install and configure Project clients. * Configure and manage time and task management settings. * Create enterprise custom fields and lookup tables. * Configure and manage time and task management settings.

* Customize project sites. * Import projects and resources. * Create and configure Project Online workflows. * Share Project Online with external users. * Work with troubleshooting tools. * How to create a custom Project Online Power BI Center. PREREQUISITES

Students should have a working knowledge of the following: * Internet web browser. * Microsoft Project Professional. * Basic project management concepts. COURSE OUTLINE Module 1: Deploying Microsoft Project Online Lesson 1: Installing Microsoft Project

Online Lesson 2: Working with Office 365 Admin Center Module 2: Managing Security Lesson 1: Overview of Project Online Security Lesson 2: SharePoint Security Permissions Lesson 3: Project Online Security Permissions Lesson 4: Creating Project Online

Security Entities Module 3: Working with Microsoft Project Clients Lesson 1: Overview of Project Clients Lesson 2: Configuring Project Clients Lesson 3: Using Project Web App Module 4: Configuring Project Online Lesson 1: Configuring Time and Task

Management Settings Lesson 2: Configuring Operational Policies Lesson 3: Importing Resources and Project Plans Module 5: Configuring Enterprise Data Settings Lesson 1: Configuring Enterprise Custom Fields Lesson 2: Configuring Enterprise Objects

Module 6: Customizing Project Sites Lesson 1: Working with Project Online Workflows Lesson 2: Sharing Project Online with External Users Lesson 3: Managing Queue Jobs and Enterprise Objects Lesson 4: Troubleshooting Tools Module 7: Project Online

Administration Lesson 1: Working with Project Online Workflows Lesson 2: Sharing Project Online with External Users Lesson 3: Managing Queue Jobs and Enterprise Objects Lesson 4: Troubleshooting Tools BONUS HANDS-ON LAB How to Create a Custom

Criminal Justice Planning and Management Series: Criminal justice management course (2 pts.) Jul 20 2020

The Banker's Handbook on Credit Risk Jun 30 2021 The Banker's Handbook on Credit Risk shows you how to comply with Basel II regulations on credit risk step by step, building on the basics in credit risk up to advanced credit risk methodologies. This advanced credit/risk management book takes a "new tools" approach to Basel II implementation. The hands-on applications covered in this book are vast, including areas of Basel II banking risk requirements (credit risk, credit spreads, default risk, value at risk, market risk, and so forth) and financial analysis (exotic options and valuation), to risk analysis (stochastic forecasting, risk-based Monte Carlo simulation, portfolio optimization) and real options analysis (strategic options and decision analysis). This book is targeted at banking practitioners and financial analysts who require the algorithms, examples, models, and insights in solving more advanced and even esoteric problems. The book comes complete with a DVD filled with sample modeling videos, case studies, and software applications to help the reader get started immediately. The various trial software applications included allows the reader to quickly access the approximately 670 modeling functions, 250 analytical model templates, and powerful risk-based simulation software to help in the understanding and learning of the concepts covered in the book, and also to use the embedded functions and algorithms in their own models. In addition, the reader can get started quickly in running risk-based Monte Carlo simulations, run advanced forecasting methods, and perform optimization on a myriad of situations, as well as structure and solve customized real options and financial options problems. * Only book to show bankers step by step how to comply with Basel II regulations on credit risk * Over 150 hands-on software applications included on the DVD accompanying the book, including sample modeling videos * Provides all the latest quantitative tools

Agile Approaches for Successfully Managing and Executing Projects in the Fourth Industrial Revolution Oct 15 2022 Communication between man and machine is vital to completing projects in the current day and age. Without this constant connectiveness as we enter an era of big data, project completion will result in utter failure. *Agile Approaches for Successfully Managing and Executing Projects in the Fourth Industrial Revolution* addresses changes wrought by Industry 4.0 and its effects on project management as well as adaptations and adjustments that will need to be made within project life cycles and project risk management. Highlighting such topics as agile planning, cloud projects, and organization structure, it is designed for project managers, executive management, students, and academicians.

Criminal Justice Planning and Management Series Jun 18 2020

Managing People - Project Controls Mar 08 2022 The *Managing People* is to introduce the tools, techniques and methodologies, deemed appropriate to identifying, developing, preparing and compensating or rewarding people to work on or in support of projects, that have been "best tested and proven" and found to work on "most projects, most of the time"; provide a logical or rationale sequence showing when those tools or techniques would normally and customarily be used and in selected instances, show how to use those

tools/techniques and/or where to find additional information on how to use or apply them.

Cost and Value Management in Projects Feb 24 2021 Cost and Value Management in Projects Project manager's guide to achieving cost efficiency and value optimization—thoroughly updated with new cases, examples, and problem sets The newly revised and updated Second Edition of Cost and Value Management in Projects provides project managers with a thorough understanding of the various dimensions of cost and value in projects, along with the factors that impact them and the managerial approaches for achieving cost efficiency and value optimization. Whereas most cost management books discuss the topic from a tactical perspective, such as through the use of simple budgeting or Earned Value Analysis, this Second Edition addresses cost from a strategic perspective, examining project management decision areas that have the potential to enhance value and providing an integrated framework for managing cost. The Second Edition includes updates to key topic areas such as project benefits realization, updated end-of-chapter exercises such as discussion questions and problem sets, updated case studies, and new spreadsheet analytic techniques and examples. Written by two highly qualified authors with significant experience in the field, Cost and Value Management in Projects includes information on: Value management through value planning, engineering, and analysis from the perspective of projects, and best practices on how to avoid common pitfalls in managing cost and value Organization strategy and project selection, organization structure and culture, project definition (and contracts), and estimating project times and cost Developing project plans and schedules, managing risk, scheduling resources and cost, reducing project duration, leadership, performance measurement, and project closure Attainment of value in complex environmental settings and benefits of effective project management Cost and Value Management in Projects is an essential resource on the subject for stakeholders at all corporate and government levels, including executives measuring performance, middle level corporate managers, project and team managers, engineers, project team members, and business consultants, along with students in related programs of study.

NW Energy Policy Project - Study Module 4, Fina... Nov 16 2022

Intellectual Capital Strategy Management for Knowledge-Based Organizations Sep 21 2020 With the proper management, knowledge-based resources (human capital, relational capital, structural capital) aim to contribute to the creation of a competitive advantage not only for companies and institutions, but also for nations and economic regions. Intellectual Capital Strategy Management for Knowledge-Based Organizations brings together new perspectives on the knowledge-based view of strategy management as it considers the role of companies, organizations, and nations in the storage and measurement of their knowledge. This book is useful for industry leaders, practitioners, academics and scholars interested in emerging aspects of knowledge management and industry services.

Tipster Text Program Phase 3 Aug 01 2021

Making Spatial Decisions Using GIS Sep 14 2022 "Making Spatial Decisions Using GIS, level 4 of the Our World GIS Education

series, allows students to experience the GIS decision-making process in real-world settings. Designed for an upper-level high school or college curriculum, the five modules in this book invite students to perform sophisticated analyses in a variety of content areas. The projects in this book encourage students to make not only maps but also the type of spatial decisions that confront professionals in all walks of life. The five modules pose decisions that will have students examine location criteria, population patterns, chemical spills, storm-ravaged coastlines, and big-city crime." "Making Spatial Decisions Using GIS presumes prior GIS experience and offers step-by-step instruction along with guidelines for more independent study. This book contains all you need to complete GIS projects, including GIS software, data, and worksheets. Companion DVDs provide a wealth of instructional resources to supplement each book. Teachers new to GIS will benefit from detailed notes and suggestions for presenting the material." "The projects in this book are connected to a variety of subject areas, such as business, government, and public administration. By completing the projects, students improve their skills in critical thinking, communication, technology, and problem-solving as delineated by the Partnership for 21st Century Skills."--BOOK JACKET.

Integrative Production Technology for High-Wage Countries Dec 25 2020 Industrial production in high-wage countries like Germany is still at risk. Yet, there are many counter-examples in which producing companies dominate their competitors by not only compensating for their specific disadvantages in terms of factor costs (e.g. wages, energy, duties and taxes) but rather by minimising waste using synchronising integrativity as well as by obtaining superior adaptivity on alternating conditions. In order to respond to the issue of economic sustainability of industrial production in high-wage countries, the leading production engineering and material research scientists of RWTH Aachen University together with renowned companies have established the Cluster of Excellence "Integrative Production Technology for High-Wage Countries". This compendium comprises the cluster's scientific results as well as a selection of business and technology cases, in which these results have been successfully implemented into industrial practice in close cooperation with more than 30 companies of the industrial production sector.

Genetic Criticism Apr 16 2020 This book introduces genetic criticism as a reading strategy which investigates the origins and development of texts over time. Using case studies including Samuel Beckett and Ian McEwan, Van Hulle discusses the concrete and more abstract dimensions of this approach.

ICEL2013-Proceedings of the 8th International Conference on e-Learning Jan 14 2020

Modern Project Finance Jan 06 2022 This cutting-edge financial casebook is divided into four modules: Structuring Projects, Valuing Projects, Managing Project Risk, and Financing Projects. The cases have been carefully selected to reflect actual use of project finance over the past five years in terms of geographic location (the cases come from 15 different countries) and industrial sectors. * Benjamin Esty, of the Harvard Business School, is one of the leading scholars in project finance. * Project finance is becoming the financing mechanism of choice for many private firms. * Cases require the reader to integrate knowledge from multiple disciplines when making a single managerial decision. This integration of functional areas such as strategy, operations, ethics, and human resource management

encourages the reader to adopt a more integrative perspective and understanding of the interconnectedness of managerial decision-making.

IGCSE Business Studies Module 4 Apr 28 2021 Business Studies is a course of four modules to prepare students for the HIGCSE or similar examinations. The modules have been developed for the Cambridge Open Learning Project (COLP) to provide access to quality education for students in Southern Africa. • The outcomes-based approach encourages students to give their own ideas • Modules are divided into units • Self-mark activities reinforce learning • Exercises help learners measure progress • Summaries reinforce what students have learnt • Answers to questions are provided • Real-life case studies from Southern Africa are included

Asian Research on English for Specific Purposes Oct 03 2021 English for Specific Purposes (ESP), addressing the communicative needs and practices of particular professional or occupational groups, has developed rapidly in the past fifty years and is now a major force in English language teaching and research. This critical volume helps innovate the theory, practice, and methodology for ESP teaching and research in Asian countries and areas. Promoting communication and enhancing cooperation on ESP research and pedagogy across cultures, it provides ESP scholars, educators and practitioners with an opportunity to benefit from each other's research and expertise in an age of globalization and digitalization. The volume provides an in-depth analysis of the latest scholarship on English teaching and research for general and specific academic and occupational purposes; the intercultural communication in ESP contexts; corpus linguistics and data-driven instruction for ESP; computer-assisted language learning and mobile-assisted language learning; evaluation of English writing courses; and ESP translation strategies.

The Physics Suite: Workshop Physics Activity Guide, Module 4 Oct 23 2020 The Workshop Physics Activity Guide is a set of student workbooks designed to serve as the foundation for a two-semester calculus-based introductory physics course. It consists of 28 units that interweave text materials with activities that include prediction, qualitative observation, explanation, equation derivation, mathematical modeling, quantitative experiments, and problem solving. Students use a powerful set of computer tools to record, display, and analyze data, as well as to develop mathematical models of physical phenomena. The design of many of the activities is based on the outcomes of physics education research. The Workshop Physics Activity Guide is supported by an Instructor's Website that: (1) describes the history and philosophy of the Workshop Physics Project; (2) provides advice on how to integrate the Guide into a variety of educational settings; (3) provides information on computer tools (hardware and software) and apparatus; and (4) includes suggested homework assignments for each unit. Log on to the Workshop Physics Project website at

[https://www.dickinson.edu/homepage/ Workshop Physics](https://www.dickinson.edu/homepage/Workshop%20Physics) is a component of the Physics Suite—a collection of materials created by a group of educational reformers known as the Activity Based Physics Group. The Physics Suite contains a broad array of curricular

materials that are based on physics education research, including: Understanding Physics, by Cummings, Laws, Redish and Cooney (an introductory textbook based on the best-selling text by Halliday/Resnick/Walker) RealTime Physics Laboratory Modules Physics by Inquiry (intended for use in a workshop setting) Interactive Lecture Demonstration Tutorials in Introductory Physics Activity Based Tutorials (designed primarily for use in recitations)

Handbook of Research on Collaborative Learning Using Concept Mapping Jan 26 2021 This new encyclopedia discusses the extraordinary importance of internet technologies, with a particular focus on the Web.

eWork and eBusiness in Architecture, Engineering and Construction Nov 11 2019 Since 1994, the European Conference on Product and Process Modelling (www.ecppm.org) has been providing a review of research, development and industrial implementation of product and process model technology in construction. The 7th European Conference on Product and Process Modelling (ECPPM 2008) provided a unique discussion platform for topics of
