**Principles of Tropical Horticulture** Mar 16 2020 Principles of Tropical Horticulture leads the reader through a background of environmental influences and plant physiology to an understanding of production and post-harvest systems, environmental adaptation techniques and marketing strategies. Focusing on the principles behind production practices and their scientific basis, rather than detailed biological traits of each crop, this text outlines successes and failures in practices to date and sets out how the quantity and quality of horticultural produce can improve in the future. Case studies are frequently used and chapters cover the production of vegetables, fruit and ornamental crops, including temperate zone crops adapted to grow in the tropics.

The Economics of Food Price Volatility Nov 11 2019 "The conference was organized by the three editors of this book and took place on August 15-16, 2012 in Seattle."--Preface.

*Proceedings of the 5th Indian Young Geotechnical Engineers Conference (5IYGEC)* Jan 14 2020 Extended Abstracts of Research Papers Published in 5IYGEC: The 5th Indian Young Geotechnical Engineers Conference, organized by Indian Geotechnical Society to commemorate Silver Jubilee of IGS, Baroda Chapter.

**Language and Sustainable Development** Dec 05 2021 This book addresses the importance of language in matters of sustainability and incorporating such concerns in implementing the UN's Sustainable Development Goals (SDGs). Sustainable language policy must aim to include all groups, including language minorities and marginalized populations, such as refugees and aid recipients, in conditions that allow for their inclusion in making and implementing policy. The book brings together nine studies covering such topics as language and digital resources, sustainable and inclusive multilingual education, national language policy, and language in peacekeeping operations. A final chapter addresses the crucial intersection between sociolinguistics and economics, and the implications of this for development and the SDGs.

**The Palgrave Handbook of Africa and the Changing Global Order** May 30 2021 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order. By connecting the past, present, and future in a continuum that shows the paradox of existence for over one billion people, the book underlines the centrality of the African continent to global knowledge production, the global economy, global security, and global creativity. Bringing together perspectives from top Africa scholars, it actively dispels myths of the continent as just a passive recipient of external influences, presenting instead an image of an active global agent that astutely projects soft power. Unlike previous handbooks, this book offers an eclectic mix of historical, contemporary, and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world.

**Advances in Unsaturated Soils** Apr 09 2022 New theories and testing techniques related with Unsaturated Soil Mechanics have proven to be valuable tools to study a broad spectrum of geo-materials which includes rocks, rock fills, frozen soils and domiciliary solid wastes. These new theories and testing techniques have permitted the analysis of several traditional problems from a new perspect

Innovative Solutions for Deep Foundations and Retaining Structures Sep 14 2022 This edited book's theme is organized as a part of the GeoMEast 2019 International Congress and Exhibition that was held in Cairo, Egypt, on November 10–14 2019. The editors like to express their deep appreciation and gratitude to the authors for their valuable contributions to the GeoMEast 2019 proceedings and to all session chairs and reviewers for their sincere efforts to make this book a reality. The editors are very grateful to have this opportunity to participate in organizing this GeoMEast 2019 conference and hope that this book theme is a valuable reference to the civil/geotechnical engineering community worldwide.

**OECD Economic Surveys: South Africa 2013** Dec 17 2022 OECD's 2013 Economic Survey of South Africa examines recent economic developments, policies and prospects. Special chapters cover improving education quality and green growth.

**Engineering Geology for Society and Territory - Volume 2** Jun 30 2021 This book is one out of 8 IAEG XII Congress volumes, and deals with Landslide processes, including: field data and monitoring techniques, prediction and forecasting of landslide occurrence, regional landslide inventories and dating studies, modeling of slope instabilities and secondary hazards (e.g. impulse waves and landslide-induced tsunamis, landslide dam failures and breaching), hazard and risk assessment, earthquake and rainfall induced landslides, instabilities of volcanic edifices, remedial works and mitigation measures, development of innovative stabilization techniques and applicability to specific engineering geological conditions, use of geophysical techniques for landslide characterization and investigation of triggering mechanisms. Focuses is given to innovative techniques, well documented case studies in different environments, critical components of engineering geological and geotechnical investigations, hydrological and hydrogeological investigations, remote sensing and geophysical techniques, modeling of triggering, collapse, run out and landslide reactivation, geotechnical design and construction procedures in landslide zones, interaction of landslides with structures and infrastructures and possibility of domino effects. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: environment, processes, issues, and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: Climate Change and Engineering Geology. Landslide Processes. River Basins, Reservoir Sedimentation and Water Resources. Marine and Coastal Processes. Urban Geology, Sustainable Planning and Landscape Exploitation. Applied Geology for Major Engineering Projects. Education, Professional Ethics and Public Recognition of Engineering Geology. Preservation of Cultural Heritage.

**Unsaturated Soil Mechanics - from Theory to Practice** Mar 28 2021 In the past decades advances have been made in the research and practice on unsaturated soil mechanics. In 2000 the first Asia-Pacific Conferences on Unsaturated Soils was organized in Singapore. Since then, four conferences have been held under the continued support of the Technical Committee on Unsaturated Soils (TC106) of the International Socie

*The Land of My Ancestors' Sepulchers* Oct 03 2021 What is it like to be born into an extended Peranakan family that has been better days? Besides poverty, there's strife when some don't pull together. However, I had a wise Grandma, Dad, and Aunt. Reading transported me into a world of joy, and soon I loved learning for its own sake. The Scriptures challenged me to seek the kingdom of heaven when I was at university. Why should I teach in Selangor rather than my beloved hometown, Penang? Could I rely on God? On several occasions, I realized that God blessed me just on time! I tried to influence my students to be intrinsically motivated. I tried to nurture a passion for knowledge. Besides teaching, I researched to facilitate the learning of my students. How could I manage caring for an aging aunt, but by God's mercy? How would I cope with my health issues, uncertain if healing would come? Would all the events, and my responses to them, show that I worship an all-powerful, merciful God in whom I can trust?

**Geotechnics of Roads 2-Volume Set** Dec 13 2019 At first glance, roads seem like the simplest possible geotechnical structures. However, analysis of these structures runs up against complexities related to the intense stresses experienced by road surfaces, their intense interaction with climate, and the complicated behavior of the materials used in road construction. Modern mechanistic approaches to road design provide the tools capable of developing new technical solutions. However, use of these approaches requires deep understanding of the behavior of constituent materials and their interaction with water and heat which has recently been acquired thanks to advances in geotechnical engineering. The author comprehensively describes and explains these advances and their use in road engineering in the two-volume set Geotechnics of Roads, compiling information that had hitherto only been available in numerous research papers. Geotechnics of Roads: Fundamentals presents stresses and strains in road structures, water and heat migration within and between layers of road materials, and the effects of water on the strength and stiffness of those materials. It includes a deep analysis of soil compaction, one of the most important issues in road construction. Compaction accounts for only a small proportion of a construction budget but its effects on the long-term performance of a road are decisive. In addition, the book describes methodologies for nondestructive road evaluation including analysis of continuous compaction control, a powerful technique for real-time quality control of road structures. Geotechnics of Roads: Advanced Analysis and Modeling develops 23 extended examples that cover most of the theoretical aspects presented in the book Geotechnics of Roads, Fundamentals. Moreover, for most examples, Volume 2 describes algorithms for solving complex problems and provides Matlab® scripts for their solution. Consequently, Volume 2 is a natural complement of the book Geotechnics of roads: Fundamentals. This unique set will be of value to civil, structural and geotechnical engineers worldwide.

Community Education and Training has been brought forward as a possible way to foster adult learning in South Africa, especially among disadvantaged groups. South Africa ...

Unsaturated Soils: Research & Applications Jul 12 2022 This book contains the contributions to the Second European Conference on Unsaturated Soils, E-UNSAT 2012, held in Napoli, Italy, in June 2012, and includes more than one hundred papers, addressing three thematic areas: experimental, modelling, and engineering.

**Wheat Landraces** Jan 06 2022 Landraces possess a very large genetic base in population structure and are dynamic populations of cultivated plants with historical origin, distinct identity, and without any formal crop improvement. They are often genetically diverse, locally adapted, and associated with traditional farming systems. Resistance genes to biotic and abiotic stress factors, which are especially diversified in landraces, are of great interest to plant breeders, faced with global climate challenge. In addition, gene pools made of different landraces grown in different ecological conditions can be used for wheat breeding to enhance quality; yield and other desirable agricultural parameters. An estimated 75% of the genetic diversity of crop plants was lost in the last century due to the replacement of high yielding modern varieties. There is, thus, an urgent need to preserve existing species, not only for posterity but also as a means to secure food supply for a rising world population. In this book, we provide an overview of wheat landraces with special attention to genetic diversities, conservation, and utilization.

**Winter Maintenance and Preservation 2013** Mar 08 2022 "TRB Transportation Research Record: Journal of the Transportation Research Board, No. 2329 consists of eight papers that explore highway anti-icer performance, remote sensing of weather and road surface conditions, statewide benefits of winter maintenance operations, measurement of salt on winter pavements, rural variable speed limits, extreme weather risk indicators, macroscopic traffic parameters, and temperature distribution in soil profiles." Pub. info.

**The Global Testing Culture** Aug 01 2021 The past thirty years have seen a rapid expansion of testing, exposing students worldwide to tests that are now, more than ever, standardized and linked to high-stakes outcomes. The use of testing as a policy tool has been legitimized within

international educational development to measure education quality in the vast majority of countries worldwide. The embedded nature and normative power of high-stakes standardized testing across national contexts can be understood as a global testing culture. The global testing culture permeates all aspects of education, from financing, to parental involvement, to teacher and student beliefs and practices. The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability, which becomes synonymous with education quality. Underlying the global testing culture is a set of values identified from the increasing literature on world culture. These include: education as a human right, academic intelligence, faith in science, decentralization, and neoliberalism. Each of these values highlights different aspects of the dialogue in support of high-stakes standardized testing. The wide approval of these values and their ability to legitimate various aspects of high-stakes testing reinforces the taken-for-granted notion that such tests are effective and appropriate education practices. However, a large body of literature emphasizes the negative unintended consequences – teaching to the test, reshaping the testing pool, the inequitable distribution of school resources and teachers’ attention, and reconstructing the role of the student, teacher, and parent – commonly found when standardized, census-based tests are combined with high-stakes outcomes for educators or students. This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts. The volume makes it clear that testing, per se, is not the problem. Instead it is how tests are administered, used or misused, and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended, undesirable consequences.

**State-permeated Capitalism in Large Emerging Economies** Feb 13 2020 This book systematically analyzes the economic dynamics of large emerging economies from an extended Comparative Capitalisms perspective. Coining the phrase ‘state-permeated capitalism’, the authors shift the focus of research from economic policy alone, towards the real world of corporate and state behaviour. On the basis of four empirical case studies (Brazil, India, China, South Africa), the main drivers for robust economic growth in these countries from the 2000s until the 2010s are revealed. These are found, in particular, in mutual institutional compatibilities of ‘state-permeated capitalism’, in their large domestic markets, and beneficial global economic constellations. Differences in their institutional arrangements are explored to explain why China and India have been more economically successful than Brazil and South Africa. The authors highlight substantial challenges for the stability of state-permeated capitalism and assess the potential future growth, sustainability and likely pitfalls for these large emerging economies. Opening further avenues for empirical and theoretical research, this book raises questions for the future of the global economic order and should appeal to academics, graduate students and advanced undergraduates in politics, economics, economic sociology and development studies. It should also prove a worthwhile and provocative read for development practitioners and policy-makers.

**Shock Waves** May 10 2022 Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate change and climate policies on poverty reduction. It also provides guidance on how to create a “win-win” situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas immediate pro-poor, emissions-reduction policies can drastically limit long-term ones.

**Laboratory Tests for Unsaturated Soils** Oct 15 2022 The testing of unsaturated soils requires greater care and effort than that of saturated soils. Although unsaturated soil mechanics has been embraced by geotechnical engineering, engineering practice has not yet caught up as the characterization of unsaturated soils is difficult and time-consuming, and made harder still by a lack of standards. Laboratory Tests for Unsaturated Soils collates test procedures to cover all laboratory tests for characterising unsaturated soils. It covers the background, theory, test procedures, and interpretation of test results. Each test procedure is broken down into simple stages and described in detail. The pitfalls of each test and the interpretation of the test results are explained. Test data and calculation methods are given, along with many numerical examples to illustrate the methods of interpretation and to offer the presentation of typical results. The book is especially useful for students and researchers who are new to the field and provides a practical handbook for engineering applications.

**Strategies for Survival at SIBIKWA 1988 – 2021** Aug 13 2022 This book provides an engaging and contextualised insight into a South African township-based arts centre that has survived the vicissitudes of steady militarisation in townships during some of the worst years of apartheid as well as the exhilaration of a new democratic policy while attempting to circumnavigate different policies and funding dispensations. Sibikwa provides arts centres across the world and especially those in decolonising countries with strategies for survival in tumultuous times. This multi-disciplinary book maps and co-ordinates wider historical, political, and social contextual concerns and events with matters specific to a community-based east of Johannesburg and provides an exploration and analysis by experts of authentic theatre-making and performance, dance, indigenous music, arts in education and NGO governance. It has contemporary significance and raises important questions regarding inclusivity and transformation, the function and future of arts centres, community-based applied arts practices, creativity, and international partnerships. This study will be of great interest to students and scholars in theatre and performance, indigenous music, dance, and South African history.

**Earthquake Geotechnics** Apr 28 2021 This volume presents select papers presented at the 7th International Conference on Recent Advances in Geotechnical Earthquake Engineering and Soil Dynamics. The papers discuss advances in the fields of soil dynamics and geotechnical earthquake engineering. Some of the themes include ground response analysis & local site effect, seismic slope stability & landslides, application of AI in geotechnical earthquake engineering, etc. A strong emphasis is placed on connecting academic research and field practice, with many examples, case studies, best practices, and discussions on performance based design. This volume will be of interest to researchers and practicing engineers alike.

**ICEL2013-Proceedings of the 8th International Conference on e-Learning** Nov 16 2022

**Social Demography of South Africa** Apr 16 2020 This edited collection investigates what progress has been made in the field of social demography in South Africa since the democratic dispensation in the country. Contributors offer a compilation of in-depth analytical studies of substantive, technical and contemporary issues in the South African demographic landscape. Accessible and topical, it is a useful reference guide to those working in disciplines such as sociology, geography, statistics and economics, and to all those trying to understand the role of national statistical agency in national development planning in Africa. This book project is funded by Statistics South Africa, Pretoria, South Africa.

**Multiphysical Testing of Soils and Shales** Oct 11 2019 Significant advancements in the experimental analysis of soils and shales have been achieved during the last few decades. Outstanding progress in the field has led to the theoretical development of geomechanical theories and important engineering applications. This book provides the reader with an overview of recent advances in a variety of advanced experimental techniques and results for the analysis of the behaviour of geomaterials under multiphysical testing conditions. Modern trends in experimental geomechanics for soils and shales are discussed, including testing materials in variably saturated conditions, non-isothermal experiments, micro-scale investigations and image analysis techniques. Six theme papers from leading researchers in experimental geomechanics are also included. This book is intended for postgraduate students, researchers and practitioners in fields where multiphysical testing of soils and shales plays a fundamental role, such as unsaturated soil and rock mechanics, petroleum engineering, nuclear waste storage engineering, unconventional energy resources and CO2 geological sequestration.
