**The Discoveries Feb 02 2021** An extraordinarily accessible, illuminating chronicle of the great moments of scientific discovery in the 20th century, and an exploration into the minds of the remarkable men and women behind them. We know and read the literary masterpieces; how many of us have had the opportunity not only to read but understand the masterpieces of science that describe the very moment of discovery? The last century has seen an explosion of creativity and insight that led to breakthroughs in every field of science: from the theory of relativity to the first quantum model of the atom to the mapping of the structure of DNA, these discoveries profoundly changed how we understand the world and our place in it. Alan Lightman tells the stories of two dozen breakthroughs made by such brilliant scientists as Einstein, Bohr, McClintock and Pauling, among others, drawing on his unique background as a scientist and novelist to reveal the process of scientific discovery at its greatest. He outlines the intellectual and emotional landscape of each discovery, portrays the personalities and human drama of the scientists involved, and explains the significance and impact of the work. Finally, he gives an unprecedented and exhilarating guided tour through each of the original papers.

***The King's Mercy* Oct 30 2020** For readers of Sara Donati and Diana Gabaldon, this epic historical romance tells of fateful love between an indentured Scotsman and a daughter of the 18th century colonial south. When captured rebel Scotsman Alex MacKinnon is granted the king's mercy--exile to the Colony of North Carolina--he's indentured to Englishman Edmund Carey as a blacksmith. Against his will Alex is drawn into the struggles of Carey's slaves--and those of his stepdaughter, Joanna Carey. A mistress with a servant's heart, Joanna is expected to wed her father's overseer, Phineas Reeves, but finds herself drawn instead to the new blacksmith. As their unlikely relationship deepens, successive tragedies strike the Careys. When blame falls unfairly upon Alex he flees to the distant mountains where he encounters Reverend Pauling, itinerate preacher and friend of the Careys, now a prisoner of the Cherokees. Haunted by his abandoning of Joanna, Alex tries to settle into life with the Cherokees, until circumstances thwart yet another attempt to forge his freedom and he's faced with the choice that's long hounded him: continue down his rebellious path or embrace the faith of a man like Pauling, whose freedom in Christ no man can steal. But the price of such mercy is total surrender, and perhaps Alex's very life.

**The Craft of Scientific Presentations Apr 04 2021** This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information

efficiently and effectively.

**Reclaiming Indigenous Planning Aug 08 2021 Centuries-old community planning practices in Indigenous communities in Canada, the United States, New Zealand, and Australia have, in modern times, been eclipsed by ill-suited western approaches, mostly derived from colonial and neo-colonial traditions. Since planning outcomes have failed to reflect the rights and interests of Indigenous people, attempts to reclaim planning have become a priority for many Indigenous nations throughout the world. In Reclaiming Indigenous Planning, scholars and practitioners connect the past and present to facilitate better planning for the future. With examples from the Canadian Arctic to the Australian desert, and the cities, towns, reserves and reservations in between, contributors engage topics including Indigenous mobilization and resistance, awareness-raising and seven-generations visioning, Indigenous participation in community planning processes, and forms of governance. Relying on case studies and personal narratives, these essays emphasize the critical need for Indigenous communities to reclaim control of the political, socio-cultural, and economic agendas that shape their lives. The first book to bring Indigenous and non-Indigenous authors together across continents, Reclaiming Indigenous**

**Genes, Girls and Gamow Jun 06 2021** Genes, Girls and Gamow is an autobiographical account of Jim Watson's life, following on from *The Double Helix*, the story of his and Francis Crick's discovery of the structure of DNA (published in 1968). Here is Watson adjusting to new-found fame, carrying out tantalizing experiments on the role of RNA in biology, and falling in love, in a tale of heartbreak, scientific excitement and ambition, laced with travelogue and '50s atmosphere.

**The Demon Under the Microscope May 25 2020** In *The Demon Under the Microscope*, Thomas Hager chronicles the dramatic history of sulfa, the first antibiotic and the drug that shaped modern medicine. The Nazis discovered it. The Allies won the war with it. It conquered diseases, changed laws, and single-handedly launched the era of antibiotics. Sulfa saved millions of lives—among them those of Winston Churchill and Franklin Delano Roosevelt Jr.—but its real effects are even more far reaching. Sulfa changed the way new drugs were developed,

approved, and sold; transformed the way doctors treated patients; and ushered in the era of modern medicine. The very concept that chemicals created in a lab could cure disease revolutionized medicine, taking it from the treatment of symptoms and discomfort to the eradication of the root cause of illness. A strange and colorful story, *The Demon Under the Microscope* illuminates the vivid characters, corporate strategy, individual idealism, careful planning, lucky breaks, cynicism, heroism, greed, hard work, and the central (though mistaken) idea that brought sulfa to the world. This is a fascinating scientific tale with all the excitement and intrigue of a great suspense novel.

*Ranting Again* Oct 22 2022 Dennis Miller is back, and he is Ranting Again in this hilarious compendium of wit, wisdom, and righteous outrage. This is good news for all of us who fume at the country's lack of common sense, and seethe at the absurdity of the daily headlines. Setting his sights higher and wider than ever before, Dennis Miller is at the top of his game, unleashing his unique brand of scathing wit on anything and everything. Taking on such targets as illegal immigration, the sobriety movement, the American school system, and men who wear tight T-shirts even though they have big breasts, Miller proves that nobody is safe from his hilarious yet hard-hitting scrutiny. Showcasing Dennis Miller's trademark blend of wide-ranging allusions, thought-provoking insights, and outrageous opinions, *Ranting Again* is a brilliant collection that is his sharpest and funniest yet.

*Logic: A Very Short Introduction* Sep 28 2020 Logic is often perceived as having little to do with the rest of philosophy, and even less to do with real life. Graham Priest explores the philosophical roots of the subject, explaining how modern formal logic addresses many issues.

*The Book of Lost Souls* Sep 21 2022 When teen witch Ivy MacTavish changes a lizard into her date for a Halloween dance, everything turns to chaos. And when no one is powerful enough to transform him back except Ivy, it sparks the rumor: Like father, like daughter. Ivy has heard it all before - that her father,

who left when she was seven - was involved with the darkest of magic. Making the rumors worse, someone uses an evil spell book to bring back two of history's most nefarious killers. Ivy's got a simple plan to set things right: find the real dark spell caster, steal the book, and reverse the spell. No problem! But she'll have to deal with something more dangerous than murderous spirits that want her and her friends dead: the school's resident bad boy and hotter-than-brimstone demon, Nick Marcelli. Nick's offering Ivy more than his help with recovering the missing book - he's offering her a way to ditch her scaly reputation as a lizard-lover. Demons are about as hard to handle as black magic, and as Ivy soon discovers, it's going to take more than a lot of luck and a little charm if she wants to survive long enough to clear her status as a dark witch, get a warm-blooded boyfriend, and have her former date back to eating meal worms before the week's end.

*The Scribe Method* Jul 07 2021 Ready to write your book? So why haven't you done it yet? If you're like most nonfiction authors, fears are holding you back. Sound familiar? Is my idea good enough? How do I structure a book? What exactly are the steps to write it? How do I stay motivated? What if I actually finish it, and it's bad? Worst of all: what if I publish it, and no one cares? How do I know if I'm even doing the right things? The truth is, writing a book can be scary and overwhelming—but it doesn't have to be. There's a way to know you're on the right path and taking the right steps. How? By using a method that's been validated with thousands of other Authors just like you. In fact, it's the same exact process used to produce dozens of big bestsellers—including David Goggins's *Can't Hurt Me*, Tiffany Haddish's *The Last Black Unicorn*, and Joey Coleman's *Never Lose a Customer Again*. **The Scientists Dec 20 2019 A wonderfully readable account of scientific development over the past five hundred years, focusing on the lives and achievements of individual scientists, by the bestselling author of In Search of Schrödinger's Cat In this ambitious new book, John Gribbin tells the stories of the people who have made science, and of the times in which they lived and worked. He begins with Copernicus, during the Renaissance, when science replaced mysticism as a means of explaining the workings of the world, and he continues through the centuries, creating an unbroken genealogy of not only the greatest but also the more obscure names of Western science, a dot-to-dot line linking amateur to genius, and accidental discovery to brilliant deduction. By focusing on the scientists themselves, Gribbin has written an anecdotal narrative enlivened with stories of personal drama, success and failure. A bestselling science writer with an international reputation, Gribbin is among the few authors who**

could even attempt a work of this magnitude. Praised as “a sequence of witty, information-packed tales” and “a terrific read” by The Times upon its recent British publication, *The Scientists* breathes new life into such venerable icons as Galileo, Isaac Newton, Albert Einstein and Linus Pauling, as well as lesser lights whose stories have been undeservedly neglected. Filled with pioneers, visionaries, eccentrics and madmen, this is the history of science as it has never been told before.

***The Falsification of History: Our Distorted Reality* Jan 01 2021**  
This book relates the current, insidious plight facing the human race as a direct result of a grand deception that has been imposed upon it for tens of thousands of years if not longer. This has been perpetrated by the systematic, ongoing falsification of history in much the same way as perpetrated by the powers that be in the suspiciously prophetic novel ‘1984’, by George Orwell. We have all been deceived on a monumental scale by a tiny clique of people who by their own birthright and bloodlines absolutely believe that they have the divine right to rule over us by whatever method best suits their purposes. In order to achieve this they have lied, deceived, murdered and even committed genocide down the millennia in an attempt to bring their ultimate goal to fruition. Find out about the use of drugs, vaccinations, micro-chipping, mind control, trans-humanism and 24/7 distractions such as non-stop sports, entertainments and the invasive ‘celebrity culture’ that attempts to pervade our whole lives.

**Raynaud’s Phenomenon Aug 20 2022** *Raynaud’s Phenomenon: A Guide to Pathogenesis and Treatment* comprehensively reviews the understanding of a disorder that continues to challenge primary care clinicians and specialists alike. In the last decade, there have been important advances not only in understanding the pathophysiology of Raynaud’s Phenomenon (RP), but also in developing diagnostic methods and effective drug and non-drug therapies. Thoroughly discussing the various manifestations of RP, including childhood RP, RP secondary to connective tissue disease, and a variety of other associated disorders that include vascular perturbation that mimics RP, this title provides a wealth

of new information available on normal and abnormal thermoregulation and helps physicians identify the best therapeutic approaches to treating RP. The work offers differential diagnosis options, reviews potential causes such as autoimmune disease, industrial trauma, drugs, and metabolic causes and provides clear recommendations for therapy. Engaging readers with case vignettes and a plethora of visual aids, *Raynaud's Phenomenon: A Guide to Pathogenesis and Treatment* is a state-of-the-art, authoritative reference and invaluable contribution to the literature that will be of interest to physicians, patients, and individuals dealing with these disease processes.

**The Alchemy of Air Mar 03 2021** A sweeping history of tragic genius, cutting-edge science, and the Haber-Bosch discovery that changed billions of lives—including your own. At the dawn of the twentieth century, humanity was facing global disaster: Mass starvation was about to become a reality. A call went out to the world's scientists to find a solution. This is the story of the two men who found it: brilliant, self-important Fritz Haber and reclusive, alcoholic Carl Bosch. Together they discovered a way to make bread out of air, built city-sized factories, and saved millions of lives. But their epochal triumph came at a price we are still paying. The Haber-Bosch process was also used to make the gunpowder and explosives that killed millions during the two world wars. Both men were vilified during their lives; both, disillusioned and disgraced, died tragically. *The Alchemy of Air* is the extraordinary, previously untold story of a discovery that changed the way we grow food and the way we make war—and that promises to continue shaping our lives in fundamental and dramatic ways.

***Neanderthal Man* Oct 10 2021** A preeminent geneticist, winner of the 2022 Nobel Prize in medicine, hunts the Neanderthal and Denisovan genomes to answer the biggest question of them all: how did our ancestors become human? *Neanderthal Man* tells the riveting personal and scientific story of the quest to use ancient DNA to unlock the secrets of human evolution. Beginning with the study of DNA in Egyptian mummies in the early 1980s and

culminating in the sequencing of the Neanderthal genome in 2010, *Neanderthal Man* describes the events, intrigues, failures, and triumphs of these scientifically rich years through the lens of the pioneer and inventor of the field of ancient DNA, Svante Pääbo. We learn that Neanderthal genes offer a unique window into the lives of our ancient relatives and may hold the key to unlocking the mysteries of where language came from as well as why humans survived while Neanderthals went extinct. Pääbo redrew our family tree and permanently changed the way we think about who we are and how we got here. For readers of Richard Dawkins, David Reich, and Hope Jahren, *Neanderthal Man* is the must-read account of how he did it.

**Vetted for Murder Jun 18 2022** Tori Mulligan is no stranger to death--she's been the editor and writer of the obituary pages and the murder mystery column of her hometown paper for the last few years. But when her position at the Gazette gets the axe, Tori is sucked into a sticky situation with a local veterinary clinic, a handsome widower, an adorable dog, and a slew of sketchy characters. Can Tori find "whodunit" in her real life murder mystery before she becomes front-page news?

**My Paper Heart Dec 12 2021** When Libby Gentry's parents receive the letter that she's failed out of school, Libby is forced to pack her Prada bag and head to work for her great aunt in rural Louisiana. **American pharmaceutical firm that may be using a German company as a front to get around the U.S. scientific and technical embargo of Cuba. What's at stake? An ex-senator, who heads up a drug company, is after big game: the surprising and stunning medical research being conducted by the Cubans to develop a more effective anticancer drug. Max, who is among other things a pilot, is assured that this will be a purely private assignment—no assassinations, no government to subvert, no informers to turn just a few easy flights and a little time in the sun. Once in Havana, he makes contact with a ravishing Cuban-American woman who is to be his "translator." Soon, he finds himself hunted as an assassin in a place where murder is sanctioned for a greater good, or greater greed, and those caught in the crossfire are as quickly consumed as a frozen daiquiri.**

**The Disease Delusion Sep 09 2021 For decades, Dr. Jeffrey Bland has been on the cutting edge of Functional Medicine, which seeks to pinpoint and prevent the cause of illness, rather than treat its symptoms. Managing chronic diseases accounts for three quarters of our total healthcare costs, because we're masking these illnesses with pills and temporary treatments, rather than addressing their underlying causes, he argues. Worse, only treating symptoms leads us down the path of further illness. In The Disease Delusion, Dr. Bland explains what Functional Medicine is and what it can do for you. While advances in modern science have nearly doubled our lifespans in only four generations, our quality of life has not reached its full potential. Outlining the reasons why we suffer chronic diseases from asthma and diabetes to obesity, arthritis and cancer to a host of other ailments, Dr. Bland offers achievable, science-based solutions that can alleviate these common conditions and offers a roadmap for a lifetime of wellness.**

**The Vitamin D Solution Oct 18 2019 Vitamin D deficiency is the most common medical condition in the world. Recent research indicates that 23 per cent of Australians have some degree of vitamin D deficiency, including up to 43 per cent of young women. As a result, they may suffer from chronic health conditions, ranging from daily annoyances such as fatigue and pain to life-threatening illnesses. But few people know why vitamin D is so important and what they can do to avoid the myriad ailments associated with its deficiency, including osteoporosis, diabetes, heart disease, and cancer. There is no better person to demystify this vitamin and showcase its place in human health than author Michael F. Holick, PhD, MD – the father of modern vitamin D research. With more than three decades spent studying the relationship between vitamin D, limited sun exposure, and human wellbeing, Dr Holick shares his findings on how combining the natural curative properties of the sun along with small lifestyle changes can help everyone to live a substantially healthier life. Armed with a three-step plan incorporating safe amounts of sun exposure, the right supplementation, and eating foods rich in vitamin D, Dr Holick**
