*No More Low Expectations for English Learners*

**Advocating for English Learners** Mar 16 2022

"English learners (ELs) are the fastest-growing segment of the K-12 population. But ELs and their families, who are in the process of learning English and navigating an often-unfamiliar education system, may not have a voice powerful enough to articulate their needs. Consequently, all teachers and administrators must advocate for this all-important diverse group of students who will become tomorrow's workforce."--Back cover.

Unlocking English Learners' Potential Dec 21 2019 A once-in-a-generation text for assisting a

new generation of students Content teachers and ESOL teachers, take special note: if you're looking for a single resource to help your English learners meet the same challenging content standards as their English-proficient peers, your search is complete. Just dip into this toolbox of strategies, examples, templates, and activities from EL authorities Diane Staehr Fenner and Sydney Snyder. The best part? *Unlocking English Learners' Potential* supports teachers across all levels of experience. The question is not if English learners can succeed in today's more rigorous classrooms, but how. *Unlocking English Learners' Potential* is all about the how: How to scaffold ELs' instruction across content and grade levels How to promote ELs' oral language development and academic language How to help ELs analyze text through close reading and text-dependent questions How to build ELs' background knowledge How to design and use formative assessment with ELs Along the way, you'll build the collaboration,

advocacy, and leadership skills that we all need if we're to fully support our English learners. After all, any one of us with at least one student acquiring English is now a teacher of ELs. "Schools are not intentionally equitable places for English learners to achieve, but they could be if the right system of support were put in place. Diane Staehr Fenner and Sydney Snyder recommend just such a system. Not only does it have significant potential for providing fuller access to the core curriculum, it also provides a path for teachers to travel as they navigate the individual needs of students and support their learning journeys." —Douglas Fisher, Coauthor of Visible Learning for Literacy

*Mathematical Thinking and Communication* Oct 11 2021 Language is deeply involved in learning mathematics as students both communicate and think about mathematical ideas. Because of this, teachers of English learners have particular challenges to overcome. Mathematical Thinking

and Communication addresses perhaps the most significant challenge: providing access to mathematics for these students. For all students- and English learners in particular-access means finding effective, authentic ways to make language clear and thinking visible so they can reason more, speak more, and write more in mathematics. Based on extensive research and collaboration with teachers, coaches, and schools, Mark Driscoll, Johannah Nikula, and Jill Neumayer DePiper outline four principles for designing instruction that creates this kind of access: challenging tasks, multimodal representations, development of mathematical communication, and repeated structured practice. Starting from the perspective that English learners are capable of mathematical thinking (even as they are learning to express their ideas verbally), the authors highlight techniques for using gestures, drawings, models, manipulatives, and technology as tools for reasoning and communication. By embedding

these visual representations into instruction-and encouraging their regular use-teachers support engagement in problem solving, facilitate mathematical dialogue, and notice evidence of students' thinking that propels them to create more engaging and equitable instruction. Enhanced by an extensive online collection of companion professional development resources, this book highlights classroom-ready strategies and routines for fostering mathematics success in all students and helping them recognize their potential.
