Standard topics such as airway management, trauma, and privacy in statistical databases is about finding a trade-off to the tension between the increasing societal and economical demand for accurate information and the legal and ethical obligation to protect the privacy of individuals and enterprises, which are the source of the statistical data. Statistical agencies cannot expect to collect accurate information from individual or corporate respondents unless these feel the privacy of their responses is guaranteed;

also, recent surveys of Web users show that a majority of these are unwilling to provide data to a Web site unless they know that privacy protection measures are in place. "Privacy in Statistical Databases 2004" (PSD2004) was the 7th annual conference of the CASC project ("Computational Aspects of Statistical Confidentiality", IST-2000-25069). PSD2004 is in the style of the following conferences: "Statistical Data Protection", held in Lisbon in 1998 and with proceedings published by the Office of Official Publications of the EC, and also the AMRADS project SDC Workshop, held in Luxemburg in 2001 and with proceedings published by Springer-Verlag, as LNCS Vol. 2316. The Program Committee accepted 29 papers out of 44 submissions from 15 different countries on four continents. Each submitted paper received at least two reviews. These proceedings contain the revised versions of the accepted papers. These papers cover the foundations and methods of tabular data

protection, masking methods for the protection of individual data (microdata), synthetic data generation, disclosure risk analysis, and software/case studies. If you find, as you grow older, that the world is becoming more baffling - indeed, more disturbing - by the day, be assured you are not alone. Countless millions in your age bracket around our planet are experiencing similar feelings. In fact, they've been doing so for some years. To suggest, then, that the publication of *The Challenges of Ageing* is timely, might well be an under-statement. After all, technical experts have, for over a decade now, been documenting the staggering impact population ageing is having on the very structure of human existence. It has been noted, for instance, that a large number of developed countries are now experiencing ageing population impacts never before encountered in human history. A United Nations study on the subject estimates that the number of older persons worldwide tripled in a 50-year period to the year

2000. It will have more than tripled again by the year 2050. The impact on everyday living for older generations is massive. Unsurprisingly, an immense volume of related statistical reports on the subject is widely available. Decidedly less available, however, is down-to-earth information focussed on achieving rewarding ageing lives within these ever-intensifying environments. Co-authors of *The Challenges of Ageing*, counselling psychologist, Maria Carmen Navarro, and novelist/historian, Norma Miraflores, have skilfully targeted this critical area of need. The result is a book for which there will surely be wide demand. Far from being yet another statistical study, *The Challenges of Ageing* provides an absorbing account on coping with difficulties as the years roll on. It can be read, initially, for an overall appreciation of the ageing phenomenon. Thereafter it can be kept for valuable ready reference as life progresses. Describes what women seek in a man and the steps a man needs to take to win women over.

This book is a survey of typical Science Fiction elements in Douglas Adams's *Hitchhiker's Guide to the Galaxy*. Christian Erckenbrecher first goes through a short history of Science Fiction and identifies certain motifs of the genre in order to correctly place the novel within a useful context. Classical elements of the Science Fiction canon are identified in the novel and scrutinized. It becomes clear that Douglas Adams was fully aware of the SF "burden" and we can see how its elements are used in order to create both

humour and criticism. The question of whether social criticism can be applied purposefully in SF will be asked. Other big questions which are posed (and answered?) in Hitchhikers are also taken into consideration: Is there a god? Will the breakdown of communication barriers between races put an end to all wars? Can the advancement of technology prevent us from destroying ourselves? Follow the author on his way through Douglas Adams's "wholly remarkable book" and see how this exceptional hitchhiking playwright and atheist writer enriched the world with his unique prose. 'Siya's rise from humble beginnings to lifting that World Cup trophy is the stuff of fairytales.' MARCUS RASHFORD 'Siya Kolisi is a warrior on the field and an inspiration off it.
